

# Let's Get Acquainted

Bill Dudley, our principal of the Wasatch Middle School, was born to Harry and Olena Kramer Dudley on May 28, 1926. His full name is Charles William Dudley. Bill was born in Spanish Fork and lived in the same house as he grew up. He attended several elementary schools and high school in Spanish Fork. He was active in athletics, student government and drama.

At the beginning of his Senior year in high school, Bill was called into the services. He spent 14 weeks training in the states and was sent to the South Pacific. There he went through the entire Okinawa Campaign. He was in the sixth wave of attack on that island before being sent on to Siapan, Luzon, Mindoro and on to Manilla. Bill was wounded on three different occasions during combat. After two and a half years overseas with the 96th Infantry Divison, he returned to his parents home on 9th East in Spanish Fork. It was so good to be home.

Bill attended the BYU University, majoring in math and a composit minor in chemistry and physics. After gaining his B.A. and graduation from BYU in 1950, he spent the following year doing graduate work in educational administration. During this time, he earned teaching certificates in elementary and secondary education.

The following two years, Bill taught math and chemistry at Wasatch High School. One of his students in chemistry was Joyce Murdock, a vivacious girl in her Senior year. They both realized there was something very special in their acquaintance, but there were rules prohibiting teacher-student dating, so they waited until Joyce graduated in the spring. They were married in the Manti Temple on Dec. 27, 1952. During the summer and autumn semesters, Joyce had attended the University of Utah.

Joyce Murdock was born March 31, 1934 to Wayne and Clarissa McAllister Murdock in Heber City. She attended elementary and high school in Heber City. Joyce's father's people were sheepmen and early settlers of Heber City. They also owned ranches in Duchesne County, where they farmed and ranched cattle and sheep. They owned these properties before Wasatch County was divided to make the two counties in 1914.

MR. and MRS. BILL DUDLEY

After Joyce and Bill were married, they lived in California while Bill attended Stanford University. While there, he earned his Master's Degree in counseling and educational psychology. He also completed all but two classes toward his doctorate in educational administration.

Bill and Joyce then returned to Utah, where he obtained a teaching position in the Salt Lake District. He was assigned to South High to teach math and to coach. During Bill's last five years at South High, he was a counselor.

Following this experience, he became the Assistant Principal at Southeast Junior High School, which was a new facility. The Superintendent chose Bill for a National Administrative Internship, and he was allowed to travel to various places in the United States to learn about many innovative programs that were being used. On returning, he was designated as administrator responsible for experimentation within the district. Bill's last four years within the district were spend as Assistant Principal in charge of curriculum and instruction at Highland High School.

Joyce and Bill Dudley came to live in Heber City eleven years ago when he became Principal of the junior high, now the middle school. They have built a nice home at 250 North 500 East. Their family of four boys were born while they lived in Salt Lake City. They are fine young men.

Lynn married Caryn Beck of American Fork. He graduated

from Utah State University with a Master's Degree in Soil Chemistry. He and his wife now live in Moscow, Ida., and he is completing his Ph.D. in Soil Chemistry at Washington State University. Caryn is completing her second year in law school at the University of Idaho.

Wayne married Becki Benlap of Salt Lake. He is in his first year of dental school at University of Washington. They are expecting their first child in July.

Kenneth has spent the last winter in the University of Hawaii working on his Associate Business Degree. He has been back from his mission to Japan for a year now.

Mark is a Sophomore at Wasatch High. He is doing well in school and has finished a busy season on the Junior Varsity Wrestling Team.

Joyce is working on her Associate Degree in nursing at the BYU. Her interests around the home include a graciously arranged home, beautiful clothing she has sewn for herself and reading. She still loves to be with her sheep and horses. At lambing time, she sometimes helps to deliver the lambs when needed. She has not forgotten her younger summers on the ranch. Last year she "broke" a colt and expects to break two of them this year.

Bill raises some sheep and cattle and does a little farming. The entire family goes hunting in season and loves to camp out.

We are glad to have them back with us.

# Wood refinishing techniques

By Rebecca W. Pappas

The Wasatch Extension Service will be showing video tapes on wood refinishing in the commission room at the county courthouse. The tapes were produced at Utah State University under the direction of Leona Windley, the Extension Housing Specialist.

The tapes will be shown on Friday, April 9 at 2 p.m. and again on Monday, April 12 at 10 a.m. The topics covered in the tape presentation are: "Removing Old

Finish," "Repairing Wood Furniture," "Preparing Wood For New Finish: Removing Stains," "Preparing Wood For New Finish: Sanding," "Sealers and Stains," "Disassembling, Glueing and Clamping," "Surface Finishes," "Penetrating Finishes," "Selection, Use and Care of Brushes," and "Wood Fillers."

These tapes provide excellent information on wood refinishers as well as showing examples of actual

furniture being treated. The extension office also has some helpful printed materials available on wood refinishing. The materials will be available to participants at these showings. Some materials will be free of charge and some will be provided for a small fee. If you have any questions regarding this program, please contact Becky Pappas, Wasatch Extension Home Economist at 654-3211, ext. 26, or stop by Room 101 in the county courthouse.

## Club

## News

We have learned about 4432. 4432 stands for four fruits and vegetables, four stands for breads and cereals, three stands for the milk group, two stands for the meat group.

We had fun making plain and fancy puddings. we made puddings plain and we made pudding fancy and puddings made from scratch.

We have a new member of our group. Her name is Tammy Chatwin. It was fun having her come.

And, we made tasty toast and cocoa. It was fun. We made cinnamon toast and cocoa.

We made submarines and soup and we made hard cooked eggs and tuna salad submarines.

## Club News

The Midway Home Cultural Club was held Monday at the old Midway School with Marguerite Huber, Verna Probst and Lethe

## Japanese Exchange Program

Four host families for Japanese youth will be selected next month for the annual 4-H Japanese Exchange Program. The Japanese youths will be arriving in Utah on July 21 and will stay for approximately four weeks. The only requirement for hosting the young Japanese boy or girl is a desire to share a learning experience, and a boy or girl of

approximately the same age as the exchange.

The four young Japanese includes two girls ages 20 and 16, and two boys ages 15 and 13.

If you or your family is interested in this program, you can contact either Jim Smedley or the Wasatch County Extension Office for more information.
